

Nothing Succeeds Like "EGG-O-SEE."

The man who preaches the best sermon; the man who tells the funniest stories; the man who keeps the best store; or the man who makes the best goods soon finds that people come to him. Merit is the best advertisement in the world. People speak well of things they know are good. They pass the good word along.

The best breakfast food is EGG-O-SEE, for it contains all the life-giving properties of nature's best food, which is wheat.

EGG-O-SEE is deeply in debt to the thousands of wives and mothers who use it in their homes, for these good women tell their neighbors about this great food.

Children and aged persons alike are friends of EGG-O-SEE.

Merit and common sense are the things that advertise EGG-O-SEE most. EGG-O-SEE is cheap. A 10-cent package contains ten liberal breakfasts. EGG-O-SEE is sold everywhere. Grocers must keep it if they want to keep their good customers, for good customers insist on buying EGG-O-SEE.

The fact that no preparation, no cooking is required, makes EGG-O-SEE very popular. Open the package; put as much as you like in a dish; pour on milk or cream and eat. It is delicious. It is wholesome. It makes you strong.

A lot of interesting facts about EGG-O-SEE have been published in book form entitled, "Back to Nature." This book also has a course of physical culture—fully illustrated. Anyone wishing this book will receive it free by addressing EGG-O-SEE Company, 10 First St., Quincy, Ill.

SENTENCE SERMONS.

Fear and fret makes life's friction. Heaven helps those who help others.

Heaven despairs of the man who despises men.

True religion nourishes the roots of right doing.

The church that courts the rich loses its riches.

Sometimes hiding another's faults heals our own.

The man who is too previous is sure to get procrastinated.

The hardest work some folks do is telling how busy they are.

You cannot keep your eyes on your watch and your heart on your work.

It does not make a man brave to lay his cowardice on his conscience.

No amount of laundry in your religion can make up for a lack of love.

There's no special merit in casting bread on the water with a hook in it.

Many a man's religion would be worth more if it had more office practice.

It's no use looking for a man's religion when it doesn't get into his looks.

Two strings to your bow may be all right if you can keep them clear of your neck.—Chicago Tribune.

COMB-HONEY SHIPPING CASE

Arrangement by Which the Glass Fronts to the Sections Are Eliminated.

The shipping case here shown was exhibited at the Michigan State Beekeepers' association convention at Jackson, and was quite favorably commented on by the members present. The freight classification put honey in "glass" as first class, and that "in wood" as second class. When this tariff was first printed, some of the roads were inclined to consider that all comb honey in shipping cases with glass front was in glass, and, consequently, the freight rate was pushed up one notch; but after considerable explanation we showed that, evidently, this classification referred to honey in bottles; that comb honey in a shipping case with glass fronts ought to go as second class because the percentage of glass was very small to the amount

THE HONEY COMB PACKING CASE, of wood. All the railroads, I think, now accept shipping cases with glass fronts as second class. But the beekeeper must not make the mistake of having such honey billed "in glass" or else it will go at first class rates.

The Aspinwall case is a very unique one; and if the discrimination against glass fronts had continued the all-wood case with the lettering would have been the solution.

The all-wood case can be made considerably cheaper, and I do not know why it would not be just as good. If the freight handler cannot read he ought to be banded from the pay-roll. Shipping cases with glass fronts have been broken into, and the fine cakes of honey despoiled by some big fingers, time and time again. The Aspinwall case would prevent anything of this kind.

The arrangement of the no-drip flaps in mortises or slots in the ends of the case is very unique. It could not, however, be very well applied to a glass-front case showing four sections deep. But where the cases are two-row, like the sample here shown, there will be no trouble about mortising for the cleats.

WHAT TO FEED CHICKENS.

Variety Is an Important Thing—Barley, Wheat and Oats Make Good Mixture.

A variety of feed is best. No single grain equals a mixture. Rye is a poor feed, barley is good, and wheat and oats the best, says Farming. A mixture of the last three mentioned with a smaller proportion of corn, is very satisfactory. Only sound grain should be fed. The average screenings in the market are an uncertain quantity. Feed all grain in deep litter, rye or wheat straw being the best, so that the hens will be compelled to scratch and get exercise. Give plenty of grit, crushed oyster shells and pure water. We usually feed mash once a day, and prefer not to feed it in the morning, but to let them warm up by scratching in the coldest part of the day. The mash may vary largely according to locality, but we prefer about one part wheat bran, two parts ground corn and oats, one part clover meal or alfalfa meal, and one part meal with the addition of a little linseed meal, middlings, charcoal and salt.

GATE FOR CHICKEN YARD.

How It Can Be Built So That It Will Not Sag—Are Simple in Construction.

I have in use several gates like that shown in the cut, which do not sag or get out of shape and prove very satisfactory. This was a much quicker way than cutting a morse and tenon. The gate was well braced with 1½x2-inch stays which were halved together at the middle. After the frame was made and painted it was covered with poultry netting.

THE POULTRY.

More attention should be given to water fowls.

When fowls need a tonic, there are some who put a few drops of tincture of iron into their drinking troughs.

Tobacco stems covered with straw are an excellent preventative of insect breeding, especially when the hens are setting.

Feed the fowls about to be shipped nothing but hard grain the day previous. They will carry better and arrive in a better condition.

Poultry keeping can be made an auxiliary to other pursuits without infringing upon the time of the keeper and will bring in a handsome return for the food and care given them.

Keeping Down the Mites.

Poultry droppings seem to be the favorite conditions for breeding mites. Coops and houses that are cleaned often are not much troubled with them. But it is a good plan not to depend too much upon anything. Careful examination needs to be made frequently, so as to be sure that they are not getting a start.

SECRET OF THE PYRAMIDS.

Brooklyn Engineer Has Simple But Convincing Theory as to Their Construction.

A Brooklyn engineer of note, who spent several years in Egyptian exploration, is of opinion that the mystery of the Pyramids has been solved, says the New York Press. The extraordinary pictures showing 200,000 men hauling on a rope to raise a 200,000-pound stone into its proper niche near the pinnacle of old Cheops is familiar to all of us. Theories as to the mode of construction are legion. But all the engineering logic and experience of to-day and for the last 100 years have failed to cast more than a shadow over the mystery. Plazzi Smith thought he knew all about it, but nothing of a practical nature has come of his researches.

It is singular that our wise men did not think of examining with critical eye the tools found in the catacombs. The old saw—a workman is known by his chips—is no better than a workman is known by his tools. Our Brooklynite says that the tools are not those of rock masons, nor mere plasterers' implements for filling the cracks between stones, but are plainly the crude Egyptian plant of operatives engaged in mixing and laying cement. What a splendid patch of sand they had as a foundation for their cement!

Cement is the coming building material. Railroads are renewing their steel, iron and stone piers, abutments, culverts, etc., with it, and it is expected to last forever. No great skill is required in manipulating it. There are no chiseling, hammering, dovetailing, no heavy lifting with derricks, no miffing. The industry has already grown to enormous proportions. Drop a sack of dry cement to the bottom of a river, and in a few minutes you have a solid stone that will never wear away. Drop 1,000 sacks on top of it and round it and presently you will have a foundation that will sustain for all time a 1,000,000-ton bridge.

Dewildered Taxpayer.

An old negro, who has accumulated enough property to buy a small home, entered the office of the list takers to return his possessions for taxation, as all good citizens do.

"With what common did you paternal ancestor burden you?" asked list-taker Charlie Ritch. In a nonchalant manner.

"Huh?" asked the taxpayer, and "What's your name?" was asked. "What's your longevity?" was the next question asked, and "Huh?" was again the response. The old darkey was doubtful whether or not he was possessed of any longevity.

"Where do you live, and what earthly possessions have you accumulated during your sojourn on this mortal coil?" inquired the list-taker, but he again had to explain to the bewildered negro, who then nervously made his mark and hastily made his departure.—Charlotte Observer.

Cods and Men.

The cods were at some pains to construct a wonderful catamaran. "It is well worth our while," quoth they, "because it will work strongly upon the imaginations of men and in that way move mind and at last accomplish truly great things."

But men could not see it. "What a pity that such power should be going to waste!" they exclaimed, and harnessed the catamaran and made a drudge of it, to turn their mills.—Puck.

A Natural Conclusion.

Mistress (severely)—How did it happen that I saw a policeman with you in the kitchen last night?

Maid—I suppose, madame, you must have looked through the keyhole.—Translated for Tales from Strekoza.

Unrepentant.

"Do you realize that you are a worm of the dust?" queried the solemn stranger.

"Not altogether," replied the flippant passenger. "I'm too shy on the dust."

Make Pets of Baby Camels.

Baby camels are great pets in South Africa, and are nursed and tended, and even carried about by their attendants. During the first few months they hardly weigh more than an ordinary dog.

Cuban Coffee.

To serve coffee in Cuban fashion put three pints of sweet rich milk into the brightest of new coffee pots and let it come to a boil. Put in a teaspoonful of ground coffee and boil five minutes. Strain and serve.

HIS ONE WEAK SPOT.

Persistent Minnesota Merchant Cured to Stay Cured by Doan's Kidney Pills.

O. C. Hayden, of O. C. Hayden & Co., dry goods merchants, of Albert Lea, Minn., says: "I was so lame that I could hardly walk."

I was an unaccountable weakness of the back, and constant pain and aching. I could find no rest and was very uncomfortable at night. As my health was good in every other way, I could not understand this trouble. It was just as if all the strength had gone from my back. After suffering for some time I began using Doan's Kidney Pills. The remedy acted at once upon the kidneys, and when normal action was restored, the trouble with my back disappeared. I have not had any return of it."

For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

THE CAMERA FIEND.

Man Was Not Satisfied with Ordinary Amusement Like Taking Pictures.

A well-known criminal lawyer one day sauntered into a police court just as a case was called. It appeared that the defendant had no attorney, and the judge glanced about the room to see whom he might assign to the case. "I'll take it, judge," the late comer said, wishing to pass away the time.

"By the way, what is the man charged with?" the attorney presently asked.

"He's a camera fiend of the worst sort," Mr. Brown, the judge said with a slight smile. "I expect to send him to the workhouse for about three months."

"What?" the lawyer shouted, indignantly. "Your honor must be joking. Send a man to the rock pile for three months for a little harmless amusement like taking pictures?"

"Well," the judge said, mildly, "he don't take pictures much—it's the cameras he takes."

The Erie Railroad has just placed orders for 1,600 new freight cars. From the Standard Steel Car Company, to be built at the Butler, Pa. shops, have been ordered 500 drop-end steel underframe gondola cars of 100,000 pound capacity, weighing 42,000 pounds each, and 45 feet in length. These are for delivery in January, 1907. For delivery in December next, the Erie has also ordered 500 flat cars, to be built by the same company. These will be 40 feet in length, with steel underframes and a capacity of 100,000 pounds.

At the American Car & Foundry Company's works at Chicago there are building 500 produce cars for delivery in November and December next. These are also steel underframe cars, 36 feet in length, and of 50,000 pounds capacity. At the same company's Detroit works are building for the Erie 100 Hart convertible cars for delivery next January. These are to be of 100,000 pounds capacity, and will weigh 43,000 pounds each. They will be 41 feet 6 inches in length, with wood bodies and steel underframes.

Five new electric cars for the Rochester division have been ordered from the St. Louis Car company for the line to Mt. Morris now being electrically equipped. Four of these are passenger cars and the fifth a combination passenger and baggage car. Each will be equipped with four 75-horsepower Westinghouse motors.

Throws Rays Half a Mile.

Light rays half a mile long and 24 times as powerful as the sort commonly in use are the new oxy-petrol lime lights that have been invented for the motorists. The lamp consists of an oxy-petrol blowpipe flame playing on a piece of specially refractory material. A reservoir of material is to be carried on the car and also a cylinder of compressed oxygen. Presumably a stream of oxygen under pressure, saturated with petrol vapor and burnt in the blowpipe and a small, extremely hot flame is produced, this being caused to impinge on something more refractory than lime.

Sheer white goods, in fact, any fine wash goods when new, owe much of their attractiveness to the way they are laundered, this being done in a manner to enhance their textile beauty. Home laundering would be equally satisfactory if proper attention was given to starching, the first essential being good starch, which has sufficient strength to stiffen, without thickening the goods. Try Defiance Starch and you will be pleasantly surprised at the improved appearance of your work.

Aged English Clergyman.

Rev. John Aldis, once the most prominent minister of the Baptist denomination in England, has reached the age of 88. He began life in a shoemaker's shop. Afterward he was sent to Horton college, near Bradford, now known as Rawdon college. Later he became pastor of Maze Pond chapel, London, and in 1866 he was elected chairman of the Baptist Union.

The greatest cause of worry on ironing day can be removed by using Defiance Starch, which will not stick to the iron. Sold everywhere, 16 oz. for 10c.

Miss Alice De Rothschild, a sister of the late Baron Ferdinand De Rothschild, has a collection of Hindoo bulls, zebras and llamas. She is also interested in cattle breeding and owns a large number of exceptionally fine carriage horses.

Lewis' Single Binder straight 5c. You pay 10c for cigars not so good. Your dealer or Lewis' Factory, Peoria, Ill.

A friend in need usually needs all he can squeeze out of you.

FOUR YEARS OF AGONY.

Whole Foot Nothing But Proud Flesh—Had to Use Crutches—"Cuticura Remedies the Best on Earth."

"In the year 1899 the side of my right foot was cut off from the little toe down to the heel, and the physician who had charge of me was trying to sew up the side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suffered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Ointment often during the day, and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day after five years of suffering. The cost of Cuticura Ointment and Soap were only \$6, but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Alliance, Ohio, June 27, 1905."

Harriman Resents Overcharge. E. H. Harriman sent his \$10,000 automobile to a repair shop in New York city in January, and when he got a bill for \$1,757, refused to pay it. The owner of the repair shop refused to surrender the vehicle and Mr. Harriman proceeded to recover it by a writ of replevin. The men who are trying to collect this large sum will now have to sue for their money. Mr. Harriman evidently believes that the charge was made in accordance with his supposed ability to pay.

Railway Tariff Simplified. Germany has just revised its railway tariff, which involves a multiplication of tickets. It is calculated that a traveler with a small family going from Mulhouse to Biele will find himself furnished with 69 tickets, in addition to which are those for baggage.

Give Defiance Starch a fair trial—try it for both hot and cold starching, and if you don't think you do better work, in less time and at smaller cost, return it and your grocer will give you back your money.

International Encyclopedia.

The medical faculty of the Paris university plans an international technical encyclopedia. It is to be issued in ten languages, including "Esperanto," the world language.

Rapid Increase in Population. In eight years the population of Osaka, Japan, has increased from \$11,500 to over 1,000,000. The number of factories has increased by 501.

Short ladies should avoid much trimming on their skirts, says a fashion writer. Yes, and so should long ladies if their husbands are short.

It isn't until a man swears off that he finds out how many fellows want to treat him.

CONFESSIONS OF DODD GASTON.

I have noticed that about the only place "silver threads among the gold" are really popular is in a song.

I feel reasonably sure of one thing: When I die nobody is going to claim that it was the result of overwork.

I do not much mind playing against a visiting man, but I do hate to be booked in competition with a baby. Nothing would so completely reconcile me to death as the appearance, at my bedside, of some of my relatives.

I would really like to be fatter, but realize that I cannot afford it. Being fatter would mean a new dress suit. I find that every young girl has a wild desire to wear her hair "up" and every old girl has the same desire to appear with "down."

I have noticed that the only time the banana does much business is at a season of the year when it has no competition.

I find that one of the hardest duties of the dramatic critic is to reconcile the average society play with the average stage furniture.

About all the ambition I have left is to grow rich enough to have a hack waiting for me while I lounge around inside smoking and "gassing."—Topeka Capital.
